

Why We Like SDJA

By Dan G. and Miguel J.

We like this school because there are a lot of friendly people in the school, and it is filled with people from different places. The teachers are very welcoming and kind. You never get teased because of your religion since everyone is the same. It is also a very good school because it has very good education. You will never leave school without having learned one thing that day. We are taught about our Jewish history, which we wouldn't learn in public schools.
